Accessories and Batteries

# motorola originals

There are many users of two-way radios, each with specific needs, requirements and working conditions. Motorola provides complete solutions, with a selection of accessories and batteries, that enable the users to customise their radios to meet these individual needs.

All the accessories and batteries from Motorola are designed, manufactured and tested to the same exacting standards as the radios they connect to. In addition Motorola have adopted a policy of gaining European standards approval for the accessory and radio combination, not just the accessory. This means that the Motorola Original logo is an assurance of quality and seamless usability.

Each accessory has been designed to address the requirements of users in specific markets. From the heavy duty headset for high noise applications to the simple earbud for customer facing roles, Motorola Original accessories and batteries can enhance the use of Motorola Professional Radios for any user.

## applications

## 9CM STUBBY ANTENNAS

**Product Details:** Available in a range of frequencies, these shorter antennas reduce the overall length of your radio whilst still providing reliable RF performance.

**Features:**

- Screw and seal connection
- Helical antenna in moulded plastic
- Frequency colour coded

**Standards:** Not applicable

**Applications:**

**Part Numbers:** PMAE4002 UHF 403 - 433MHz (green)  
PMAE4006 UHF 465 - 495MHz (orange)  
PMAD4009 UHF 336 - 370MHz (yellow)  
NAE6522 UHF 438 - 470MHz (green)  
PMAD4025 VHF 150 - 161MHz (brown)  
NAD6502 VHF 146 - 174MHz (black)

**Benefits:**

- Mounts quickly and securely to your radio
- Robust and durable
- Easily identifies the correct antenna for your radio

**Radios:** All

PMAE4003 UHF 433 - 470MHz (silver/grey)  
PMAE4007 UHF 490 - 527MHz (grey)  
PMAD4022 UHF 300 - 340MHz (purple)  
PMAD4012 VHF 136 - 155MHz (red)  
PMAD4013 VHF 155 - 174MHz (black)  
NAF5042 806 - 941MHz

## 14CM HELICAL ANTENNAS

**Product Details:** Available in a range of frequencies, these standard length antennas are designed to optimise the performance of your radio.

**Features:**

- Screw and seal connection
- Helical antenna in moulded plastic
- Frequency colour coded

**Standards:** Not applicable

**Applications:**

**Part Numbers:** PMAD4014 VHF 136 - 155MHz (red)  
PMAD4023 VHF 150 - 161MHz (brown)

**Benefits:**

- Mounts quickly and securely to your radio
- Robust and durable
- Easily identifies the correct antenna for your radio

**Radios:** All

PMAD4015 VHF 155 - 174MHz (black)

## 14CM/17CM WHIP ANTENNAS

**Product Details:** Available in 2 broad range UHF frequencies. These longer length antennas are designed to provide excellent RF performance in a more flexible form.

**Features:**

- Screw and seal connection
- Helical antenna in moulded plastic
- Frequency colour coded

**Standards:** Not applicable

**Applications:**

**Part Numbers:** NAB6064 Low band antenna  
PMAE4008 UHF 470 - 530MHz 14cm (no colour)

**Benefits:**

- Mounts quickly and securely to your radio
- Robust and durable
- Easily identifies the correct antenna for your radio

**Radios:** All

NAE6483 UHF 403 - 470MHz  
NAF5037 806 - 870MHz (18cm)

# batteries

## NICKEL CADMIUM (NICD)

**Product Details:** Nickel Cadmium is the most widely used battery technology and is best suited for use in extreme temperatures. As with all Motorola, products these are designed, tested and manufactured to the highest standards to ensure maximum safety, durability and performance.

### Features:

- Manufactured using premium energy cells
- Nickel Cadmium technology
- Highest standards of construction

**Standards:** Factory Mutual (FM)\*  
\*HNN9011 only

### Applications:

**Part Numbers:** HNN9012 High Capacity

HNN9011 FM High Capacity

### Benefits:

- Gives reliable, consistent, charge after charge performance
- Maintains performance across a wide temperature range
- Designed to withstand the knocks and blows of everyday use

**Radios:** All

## LITHIUM ION (LI ION)

**Product Details:** Lithium Ion provides the best power to weight ratio of the 3 technologies. Our super light, slimline battery gives you great performance where size and weight are a major consideration. As with all Motorola products it is designed, tested and manufactured to the highest standards to ensure maximum safety, durability and performance.

### Features:

- Manufactured using premium energy cells
- Lithium Ion technology
- Highest standards of construction

**Standards:** Not applicable

### Applications:

**Part Numbers:** HNN9013 High Capacity

### Benefits:

- Gives reliable, consistent, charge after charge performance
- Zero memory effect provides consistent power, charge after charge
- Designed to withstand the knocks and blows of everyday use

**Radios:** All

## NICKEL METAL HYDRIDE (NIMH)

**Product Details:** Nickel Metal Hydride provides a better power to weight ratio than Nickel Cadmium technology. This makes it best suited for users who require longer talk and standby time. As with all Motorola products these are designed, tested and manufactured to the highest standards to ensure maximum safety, durability and performance.

### Features:

- Manufactured using premium energy cells
- Nickel Metal Hydride technology
- Highest standards of construction

**Standards:** Factory Mutual (FM)\*  
\*HNN9010 only

### Applications:

**Part Numbers:** HNN9008 High Capacity

HNN9010\* FM Ultra High Capacity

### Benefits:

- Gives reliable, consistent, charge after charge performance
- Less prone to memory effect therefore providing more consistent power, charge after charge than Nickel Cadmium
- Designed to withstand the knocks and blows of everyday use

**Radios:** All

HNN9009 Ultra High Capacity

# chargers

## SIX UNIT CHARGER

**Product Details:** Our multiple unit chargers will fully charge your Motorola batteries in approximately 90 minutes, with or without the radio. It is ideal for groups with larger fleets of radios. This rapid rate multi-unit charger is compatible with all 3 battery chemistries, with UK or Euro plug, and available with a separate wall mount kit.

**Features:**

- Tri Chemistry rapid charging
- LED charge state indicators

**Standards:** Not applicable

**Applications:**

**Part Numbers:** MDHTN3004 Euro line cord  
NLN7967 Wall mount kit

**Benefits:**

- Automatically detects the chemistry of the battery and selects the optimum charging method
- View the charge status of your battery at a glance

**Radios:** All

MDHTN3005 UK line cord

## SINGLE UNIT DESKTOP CHARGER

**Product Details:** Our single unit desktop chargers will charge your Motorola battery in approximately 90 minutes with or without the radio and are ideal for either individuals or small groups of users. This rapid rate charger is compatible with all 3 battery chemistries and available with a separate wall mount power supply with UK or Euro plug.

**Features:**

- Tri Chemistry rapid charging
- LED charge state indicators

**Standards:** Not applicable

**Applications:**

**Part Numbers:** MDHTN3001 Euro plug

**Benefits:**

- Automatically detects the chemistry of the battery and selects the optimum charging method
- View the charge status of your battery at a glance

**Radios:** All

MDHTN3002 UK plug

## VEHICLE ADAPTER

**Product Details:** The EN1000 range of vehicular adapters has been developed specifically for professionals who need to use their GP Professional Series portable radio on the move. Once the adapter is installed in the vehicle the radio just 'clicks' into place and your GP Series portable turns into a virtual mobile radio.

**Features:**

- In-vehicle charging and power system
- Extended coverage with an antenna adapter allowing an automatic switch to an external antenna
- Programming feature: the radio may be programmed whilst in the vehicle adapter

**Standards:** FM standard

**Applications:**

**Part Numbers:** EN1006 VHF Vehicle adapter (136 - 174 MHz)  
EN1008 UHF2 Vehicle adapter (450 - 527 MHz)

**Benefits:**

- Can charge a stand-alone battery or a radio with a battery
- Acts as a battery eliminator by providing a source of power while the radio is in use

**Radios:** All

EN1007 UHF Vehicle adapter (403 - 470 MHz)  
EN1009A (300MHz)

NEW

## TRAVEL CHARGER

**Product Details:** The Travel Charger kit is an economical solution for charging your GP Professional Series portable radio in a vehicle. The kit includes a cigarette lighter adapter attached to a charger pocket (12V), a mounting bracket to mount the travel charger onto the vehicle's dashboard and an elastic strap for increased stability.

**Features:**

- Tri Chemistry rapid charging
- LED charge state indicators

**Standards:** FM approved

**Applications:**

**Part Numbers:** MDRLN4883

**Benefits:**

- Can charge a stand-alone battery or a radio with a battery
- Acts as a battery eliminator by providing a source of power while the radio

**Radios:** All

# audio accessories

## LIGHTWEIGHT HEADSET WITH BOOM MICROPHONE

**Product Details:** These comfortable, lightweight headsets with adjustable headband can be used on either ear thanks to their reversible boom microphones and padded earpieces. The model with in-line, clip-on Push To Talk offers ease of radio communication, particularly for customer facing roles.

**Features:**

- Comfortable and light headset with single earpiece
- Reversible boom microphone
- Partly coiled cable
- Optional in-line, clip on Push To Talk

**Standards:** FM approved

**Applications:**

**Part Numbers:** MDRMN4031

**Benefits:**

- Can be used for lengthy periods of time
- Enables headset to be worn on either ear
- Minimum pull, maximum flexibility and comfort
- Convenient radio communication

**Radios:** All

MDRMN4018 with in-line Push To Talk

NEW

## BREEZE HEADSET

**Product Details:** This stylish headset is particularly effective in customer facing situations. Its innovative flexible design allows it to be worn comfortably around the back of the head, negating the need for a headband. Light and discreet, it provides high quality radio communication. The in-line Press To Talk button enables the headset to be utilised hands free when VOX is programmed in the radio.

**Features:**

- Single earpiece with adjustable boom microphone
- Innovative behind-the-head flexible headband

**Standards:** FM approved

**Applications:**

**Part Numbers:** ENMN4012

**Benefits:**

- Allows unobtrusive two way communication
- Stylish and lightweight, can be worn for extended periods of time

**Radios:** All

NEW

## LIGHTWEIGHT HEADSET

**Product Details:** This lightweight headset allows continuous high quality radio communication in working areas with moderate background noise. The padded single earmuff and adjustable headband yield improved comfort and privacy. Once the headset is installed the radio microphone and radio speaker will be disabled.

**Features:**

- Comfortable and lightweight with adjustable headband
- Single padded earmuff
- Multi-position boom microphone

**Standards:** FM approved

**Applications:**

**Part Numbers:** ENMN4015

**Benefits:**

- Can be used for long periods of time
- Enhanced privacy in environments with moderate background noise
- Unobtrusive, can be worn on either side of the head

**Radios:** All

NEW

## MEDIUM WEIGHT BEHIND-THE-HEAD HEADSET

**Product Details:** With its padded earmuffs, this noise cancelling medium weight headset provides high quality radio communication in noisy environments. The in-line Press To Talk button ensures hands free operation of the headset when VOX is programmed in the radio.

**Features:**

- Noise cancelling multi-position microphone
- Noise reducing earmuffs
- Behind-the-Head steel sprung headband

**Standards:** FM approved

**Applications:**

**Part Numbers:** ENMN4016

**Benefits:**

- Can be worn on either side of the head
- Comfortable and clear communication in noisy working environments
- Can be worn with most safety headgear

**Radios:** All

# audio accessories

## ULTRA LIGHTWEIGHT HEADSET WITH BOOM MICROPHONE

**Product Details:** This particularly stylish and lightweight headset is ideal for customer facing roles. Its innovative design allows it to be securely worn on either ear by means of an earpiece and ear loop, negating the need for a headband. Despite its small size this headset provides good audio performance via its small boom microphone and earbud.

### Features:

- Light and ergonomically designed to be worn on the ear
- Low profile boom microphone and earbud

**Standards:** FM approved

### Applications:

**Part Numbers:** MDRMN4017

### Benefits:

- No headband
- Provides stylish and discreet communication

**Radios:** All

## MEDIUM WEIGHT HEADSET WITH NOISE CANCELLING MICROPHONE

**Product Details:** With its padded headband and earmuffs, this noise cancelling medium weight headset provides top quality radio communications with maximum comfort. Ideal for more rugged environments, this headset comes in standard or in-line Push To Talk models. The model with in-line, clip-on Push To Talk offers ease of radio communication.

### Features:

- Padded headband and earmuffs
- Noise cancelling microphone
- Optional in-line, clip on Push To Talk

**Standards:** FM approved

### Applications:

**Part Numbers:** MDRMN4032

### Benefits:

- Comfortable for extended periods of time
- High quality audio performance best suited to noisy environments
- Convenient radio communication

**Radios:** All

MDRMN4019 with in-line Push To Talk

NEW

## MINI LAPEL MICROPHONE KIT

**Product Details:** This three wire audio accessory is ideal when radio communication requires maximum discretion. The earpiece provides comfortable and private listening in quiet environments while the separate Push To Talk button fits easily in the palm of the hand for remote Press To Talk. The clip-on microphone can be securely and discreetly attached inside the collar of a shirt, jacket or other item of clothing. Once in use the microphone and radio speaker will be disabled.

### Features:

- Small and discreet
- Separate Push To Talk button and clip-on microphone
- Single earbud

**Standards:** FM approved

### Applications:

**Part Numbers:** ENMN4014 black

### Benefits:

- Provides un-obtrusive two way communication
- Enables covert radio communication
- Enhanced privacy

**Radios:** All

ENMN4017 beige

## HEAVY DUTY HEADSET

**Product Details:** This superior quality headset is specifically designed for use in the most arduous of environments. Designed with a behind the head solid steel sprung headband and cloth top headband that allows it to be worn with many types of safety headgear. In addition, the headset incorporates a noise cancelling microphone and noise reducing earmuffs for use in high noise applications.

### Features:

- Noise cancelling microphone technology
- 24dB Rated noise reduction ear defenders
- Field repairable

**Standards:** FM approved

### Applications:

**Part Numbers:** MDRMN4020

### Benefits:

- Ensures clear communication
- Ideal for noisy working environment
- Orderable spare parts allow for the headsets components to be replaced if broken

**Radios:** All

## DISCREET RECEIVE ONLY EARPIECE

**Product Details:** This receive only earpiece is particularly useful in customer facing roles or when transmission is required only occasionally. Available in black or beige, this may be made more discreet by the addition of one of our clear acoustic ear tubes and clear comfortable earpieces.

**Features:**

- Small and discreet
- Clear radio reception

**Standards:** FM approved

**Use With:** NTN8370, NTN8371 and RLN4760 to RLN4765

**Applications:**

**Part Numbers:** MDRMN4021 beige

**Benefits:**

- Ideal for roles where unobtrusive use of two way radio is required
- Permanent radio message awareness

**Radios:** All

MDRMN4028 black

## DISCREET EARPIECE, WITH SEPARATE EARPIECE AND MICROPHONE/PUSH TO TALK

**Product Details:** Available in black or beige, this discreet earpiece is a perfect solution when discretion in radio communication is needed. The earpiece, combined with a separate and easily concealable microphone/Push To Talk, is primarily designed for covert operation, security and customer facing roles.

**Features:**

- Small and discreet
- Clear radio reception
- Separate microphone/Push To Talk

**Standards:** FM approved

**Use With:** NTN8370, NTN8371, and RLN4760 to RLN4765

**Applications:**

**Part Numbers:** MDRMN4022 beige

**Benefits:**

- Ideal for roles where unobtrusive use of two way radio is required
- Permanent radio message awareness
- Guarantees covert and effective communication

**Radios:** All

MDRMN4029 black

## CLEAR ACOUSTIC EAR TUBE FOR EARPIECES

**Product Details:** Compatible with all discreet earpieces, this acoustic tube will provide you with enhanced discretion and comfort. You will be able to maintain a high level of radio communication even in noisy environments.

**Features:**

- Comfortable replaceable plastic or foam ear tips
- Coiled transparent acoustic tube

**Standards:** Not applicable

**Use With:** All discreet earpieces

**Applications:**

**Part Numbers:** NTN8370 foam

**Benefits:**

- Suited for all applications
- Can be discreetly placed around either ear

**Radios:** All

NTN8371 eartip

## EARBUD WITH COMBINED PTT/MICROPHONE

**Product Details:** The ergonomically styled ear cap and thumb profile housing for the combined PPT/microphone make the earbud an ideal solution for customer facing personnel in a fast paced environment. For enhanced convenience and hands-free use this accessory can operate in VOX (voice activated) mode.

**Features:**

- Easy to rotate ear cover
- Convenient omni-directional clip
- Walkman style earbud

**Standards:** Not applicable

**Applications:**

**Part Numbers:** MDPMLN4418

**Benefits:**

- Can be worn in either ear
- Optimal upper body positioning for ease of use
- Comfortable, can be worn for extended periods of time

**Radios:** All

# audio accessories

## CLEAR COMFORTABLE EAR INSERT FOR EARPIECES

**Product Details:** Designed to the highest standards, to cater for either ear and in three different sizes, these transparent ear inserts will improve covert operations. Perfectly moulding to the inside of your ear, they can be used in conjunction with the acoustic ear tube for extended periods.

**Features:**

- Six different models
- Fits perfectly the inside of the ear
- Used with transparent acoustic tube

**Standards:** Not applicable

**Use With:** NTN8370 and NTN8371

**Applications:**

**Part Numbers:** RLN4760 to RLN4765

**Benefits:**

- Fits left or right ear and comes in three different sizes: small, medium and large
- Comfortable and can be used extensively
- Complete discretion and ideal for high noise environments

**Radios:** All

NEW

## FLEXIBLE EAR RECEIVER

**Product Details:** This flexible ear receiver allows continuous incoming radio communication. The fully adjustable earloop fits comfortably and securely on either ear and once plugged in the receiver mutes the internal radio speaker and switches the receive audio to earpiece.

**Features:**

- Receive only earpiece
- Stylish multi-position receiver
- Cushioned ear receiver

**Standards:** FM approved

**Applications:**

**Part Numbers:** ENMN4013

**Benefits:**

- Continuous incoming radio communication
- Optimal fit, ideal for customer facing roles
- Comfortable for extended periods of time

**Radios:** All

NEW

## RECEIVE-ONLY EARPIECE WITH TRANSLUCENT TUBE

**Product Details:** This audio accessory has been specifically designed to be used with the noise cancelling Remote Speaker Microphone (RSM) and Public Safety Speaker Microphone (PSSM). Once the receiver-only earpiece is plugged in, it disables the RSM or PSSM's speaker.

**Features:**

- Disables the RSM's or PSSM's speaker
- Straight and coiled cord
- Swivel clip

**Standards:** FM approved

**Applications:**

**Part Numbers:** MDRLN4941

**Benefits:**

- Constant and discreet radio listening
- Minimum pull and maximum flexibility
- Enhanced stability and comfort

**Radios:** All

## EARBUD WITH 3.5 MM PLUG

**Product Details:** This light and simple earpiece has been specifically designed to be used in conjunction with the GP Professional Noise Cancelling RSM and PSSM. For discreet listening the Earbud connects quickly via a 3.5mm jack and once connected it disables the RSM's or PSSM's speaker.

**Features:**

- Replaces the speaker when used with the GP Professional messages Remote Speaker Microphones and Public Safety Speaker Microphone
- Combination straight and coiled cord

**Standards:** FM approved

**Use With:** MDHMN9053 and MDHMN9054

**Applications:**

**Part Numbers:** MDRLN4885

**Benefits:**

- Allows the user to constantly and discreetly listen to radio
- Minimum pull, maximum flexibility and comfort

**Radios:** All

NEW

## FLEXIBLE EAR RECEIVER FOR THE REMOTE SPEAKER MICROPHONE (RSM) AND PUBLIC SAFETY SPEAKER MICROPHONE (PSSM)

**Product Details:** This flexible ear receiver is a stylish and cost effective solution designed to enhance the use of the noise cancelling MDHMN9053 and MDHMN9054. The 3.5 mm plug ensures quick and easy connection. The fully adjustable earloop fits comfortably and securely on either ear. Light and cushioned, it can be worn for extended periods of time.

**Features:**

- Receive only earpiece
- Cushioned ear receiver
- Fully adjustable ear piece

**Standards:** FM approved

**Use with:** MDHMN9053 and MDHMN9054

**Applications:**

**Part number:** WADN4190

**Benefits:**

- External on-ear usage
- Optimal fit, ideal for public facing roles
- Comfortable, fits all ear sizes

**Radios:** All

NEW

## STANDARD AND NOISE CANCELLING REMOTE SPEAKER MICROPHONE

**Product Details:** Best utilised with a carry accessory, this microphone provides you with remote "talk and listen" capability in a robust, lightweight and compact housing.

**Features:**

- Coiled cord
- Omni-directional clip
- Provides remote talk and listen capability

**Standards:** FM approved

**Applications:**

**Part Numbers:** MDHMN9052 standard

**Benefits:**

- Minimizes strain
- Offers optimal upper body positioning
- Suited to noisy environments

**Radios:** All

MDHMN9053 noise cancelling

## PUBLIC SAFETY SPEAKER MICROPHONE (UHF ONLY)

**Product Details:** Best utilised with a carry accessory, this microphone provides you with remote "talk and listen" capability in a robust, lightweight and compact housing. In addition it enables users to connect the antenna to the PSSM instead of the radio.

**Features:**

- Straight cord
- Omni-directional clip
- Provides remote talk and listen capability

**Standards:** FM approved, UHF only

**Applications:**

**Part Numbers:** MDHMN9054

**Benefits:**

- Minimizes strain
- Offers optimal upper body positioning
- Suited to noisy environments

**Radios:** All

## VOICEDUCER MODULES

**Product Details:** These radio interface modules, when used with the ear microphone, use bone induction technology to pick up the vibrations from your speech through your ear. This not only negates the need for an external microphone but also minimises the pick up of background noise, making it ideal for use in high ambient noise environments.

**Features:**

- Uses bone induction technology
- Available with standard or high noise ear microphones (purchased separately)
- Belt mounted
- Optional VOX (voice activated) mode

**Standards:** FM approved

**Use With:** BDN6677 black (standard noise up to 95 dB),  
BDN6678 beige (standard noise up to 95 dB),  
BDN6641 grey (high noise up to 105 dB)

**Applications:**

**Part Numbers:** MDRMN4044 with Push To Talk  
MDRMN4045 with Push To Talk and VOX (voice activated)

**Benefits:**

- Earpiece provides both talk and listen functionality
- Effective in high ambient noise environments up to 105 dB
- Discreet and easy to wear
- Offers complete hands free solution

**Radios:** Not MPT models

# audio and carry accessories

## NOISE-COM™ WITH PUSH TO TALK

**Product Details:** This latest high performance audio accessory is specifically designed for users who require radio communications in high noise environments. Easily fitted into a pair of passive earmuffs, the integrated Push To Talk on the headset also provides hands free VOX operation, when programmed in your radio.

### Features:

- Simple and easy to mount onto existing passive earmuffs
- Low profile reversible microphone
- Coiled expandable cord

**Standards:** FM approved

### Applications:

**Part Numbers:** ENMN4010

### Benefits:

- Provides high quality RF communications in high noise environments
- Can be inserted in either earmuff
- Minimum stretch and maximum comfort

**Radios:** All

## HELMET-COM™ WITH PUSH TO TALK MODULE

**Product Details:** This high performance bone inducted audio accessory can easily and securely be fitted to most helmet webbing systems. Available with in line Push To Talk module for ease of communication, the long curly cable also provides maximum comfort.

### Features:

- Bone inducted technology
- Easily clips onto most helmet webbing systems
- Large red Push To Talk module with velcro or belt clip

**Standards:** FM approved

### Applications:

**Part Numbers:** ENMN4018

Helmet-com, noise-com and com-control are trademarks of SAVOX Communications Ltd/KITEK Oy AB

### Benefits:

- Clear and reliable RF communication
- Ideal for high noise or rugged environments

**Radios:** All

## PLASTIC CARRY HOLSTER

**Product Details:** With its slide-in belt clip, this plastic radio holster is an ideal lightweight carry accessory. Mounted on a durable metal spring clip, the easy release provides "hands free" operation yet greater mobility when needed.

### Features:

- Durable 5.1 cm spring action mounted belt clip
- Easy release

**Standards:** Not applicable

### Applications:

**Part Numbers:** HLN9952

### Benefits:

- Robust and lightweight carry accessory
- Attaches easily to most belts

**Radios:** All

## SPRING BELT CLIPS (38.1mm or 50.8mm)

**Product Details:** These two clips are a cost-effective solution to carry your radio "hands free". Easily mounted onto the back of all your Motorola batteries, these clips guarantee robust and durable belt mounting.

### Features:

- Spring action mounting clip
- Light, cost effective and robust

**Standards:** Not applicable

### Applications:

**Part Numbers:** HLN9844 (38.1mm)

### Benefits:

- Slides easily on the back of the battery
- Reliable and durable belt mounting

**Radios:** All

HLN9714 (50.8mm)

# carry cases

## LEATHER CASE WITH STANDARD BELT LOOP

**Product Details:** Widely used, the standard leather carry case with belt loop is made from the highest quality of thick leather. It provides the best protection for your radio and ensures convenient "hands free" carrying.

**Features:**

- Constructed to the highest standards of quality and robustness
- Comfortable

**Benefits:**

- Offers durable and reliable protection
- Attaches easily to most belts

**Standards:** Not applicable

**Radios:** See below

**Use With:** Shoulder strap

**Applications:**

**Part Numbers:** See below

## LEATHER CASE WITH SWIVEL BELT LOOP

**Product Details:** Also widely used and popular, the standard leather carry case with swivel belt loop is made from the highest quality of thick leather. The case provides the best protection for your radio while the swivel ensures convenient "hands free" carrying.

**Features:**

- Constructed to the highest standards of quality and robustness
- Comfortable
- Belt clip comes with a swivel

**Benefits:**

- Offers durable and reliable protection
- Attaches easily to most belts
- Radio can be used detached from the belt loop

**Standards:** Not applicable

**Radios:** See below

**Use With:** Shoulder strap

**Applications:**

**Part Numbers:** See below

## NYLON CASE WITH STANDARD BELT LOOP

**Product Details:** The nylon carry case is a popular alternative to the various leather cases. Built to the same high standards of quality, it provides an ideal cost effective combination of robustness and low weight. It comes with a belt loop and a t-strap to ensure secure mounting.

**Features:**

- Constructed to the highest standards of quality and robustness
- Belt loop and t-strap

**Benefits:**

- Offers durable, light and easy to clean protection for your radio
- Ensures secure mounting

**Standards:** Not applicable

**Radios:** See below

**Use With:** Shoulder strap

**Applications:**

**Part Numbers:** See below
